## GOOGLE HI-TECH HOUSE A GOLDMINE FOR THIEVES

Apparently the UK's first Google House has been kitted out in a flat in Streatham. Will Davies, head of property maintenance firm [aspect.co.uk](http://aspect.co.uk), said the "normal flat" on a very normal street is fitted with all of the future hi-tech gadgets and gizmos that make it the house of the future, today.

"We wanted to do this in a normal abode to show it is not just for the super rich - it's for anyone from any social demographic," said Davies.

One question that springs to mind, however is, how long will it be before the place gets done over? According to UK Crime Stats, there were 84 burglaries in Streatham in September.
